Voice Bot Interface with AI Integration

Experience seamless user interaction with our advanced chat interface, powered by AI and designed for intuitive engagement.

Voice Bot | Learn More

Enhanced User Interaction

1 Dynamic Command Handling

Enables commands list display and dynamic commands handling for enhanced user engagement.

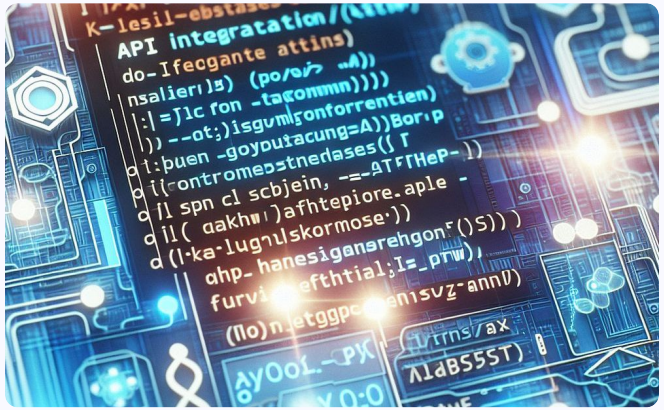

2 Real-Time Speech Recognition

Incorporates real-time speech recognition for natural voice-based communication.

3 Multimedia Integration

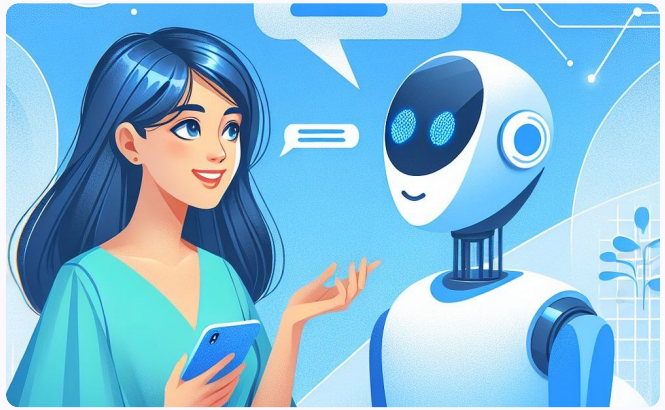

Offers functionality to convert text responses to audio for auditory interaction and allows users to play, download, and upload speech files for convenience.

AI-Powered Chat Completions

Intégration de l'API

Utilise le modèle GPT-3.5 Turbo pour des compléments de conversation intelligents.

Génération de réponses

L'assistant de discussion génère des réponses précises en fonction des invites de l'utilisateur et maintient un flux de conversation fluide.

Mises à jour en temps réel

Affiche les mises à jour de l'historique de la discussion de manière dynamique pour une expérience utilisateur transparente.

AI Assistance for Financial Insights

Stock Information

Fetch real-time data and receive detailed analysis and recommendations to inform your investment decisions.

Candlestick Analysis

Conduct in-depth candlestick pattern analysis to gain valuable stock market insights.

Position Size Calculation

Compute optimal position size based on your account balance and risk tolerance to make informed trading decisions.

Special Commands and API Integration

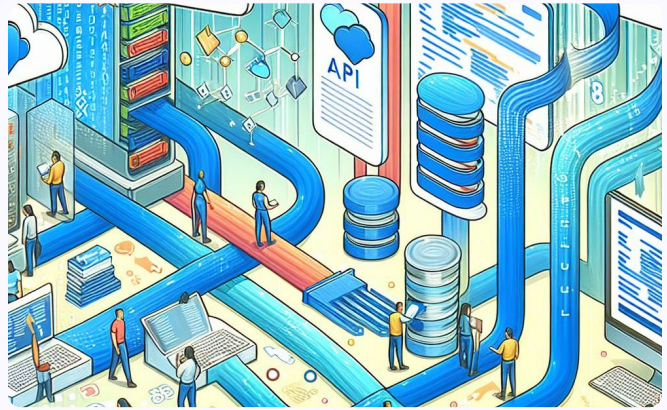

Command Input

Users can execute special commands to fetch stock data, analyze volume, and manage trades.

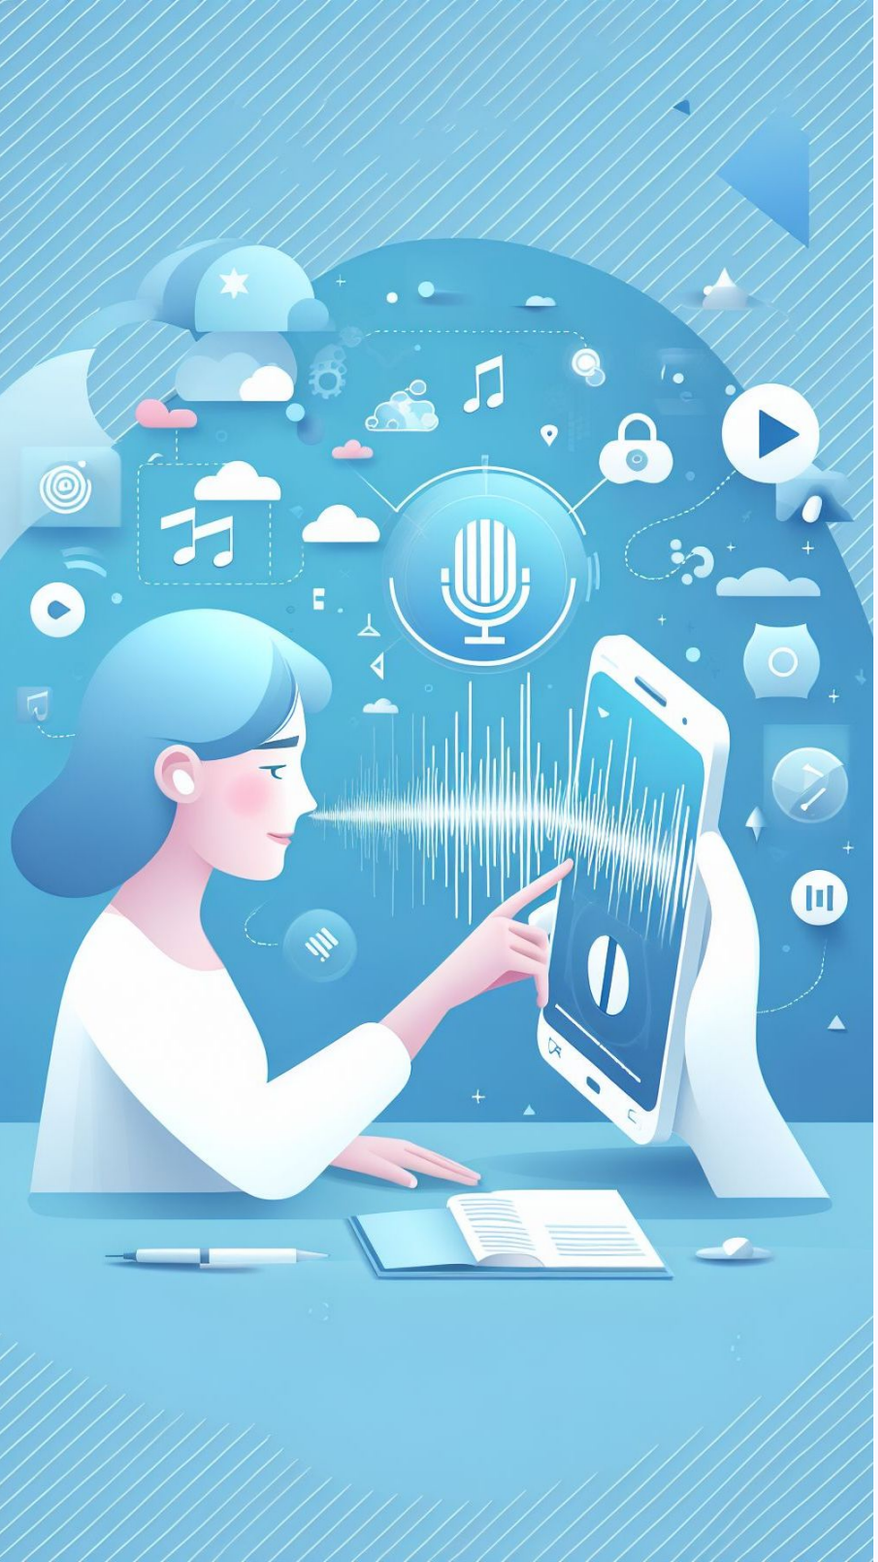

Command Execution

The system executes these commands, gathering relevant information to provide tailored insights.

API Integration

The platform interacts with external APIs to collect data and present meaningful analysis to users.

Speech Recognition and Audio Management

Voice-Based Communication

Enhances user experience through speech recognition and command execution.

Audio File Management

Enables uploading, downloading, and playing speech files for seamless interaction.

Error Handling

Ensures error-free speech recognition and processing for smooth user interaction.
