

Deep Dive Stripe API (Dark Mode)

Materialize CSS Dark • Stripe API Features • Core Payments APIs • Billing & Subscriptions • Connect & Marketplaces • Issuing, Treasury & Capital • DevTools

Visit Stripe.com **API Quickstart**

⚡Stripe API Quickstart

Base URL

Base URL: https://api.stripe.com/v1/ (HTTPS required)

- Auth: HTTP Basic Auth – Username: your `sk_...`, leave password blank
- Connect: Add header: `Stripe-Account: acct_...`
- RAK/OAuth: Restricted API Keys or OAuth tokens for marketplaces

Get Started Fast

Secure, flexible, and ready for integration. Use your secret key for authentication and connect accounts for marketplace support.

- HTTPS required for all requests
- Supports both direct and connected account flows

Stripe.com API Features

Topic	Endpoint / Params	Function	Features	Benefits	Auth
Authentication	–	Secures all API calls	• sk_test…/sk_live… keys • Restricted keys • Instant Test↔️Live switch • Granular permissions	Uniform security Flexible key rotation	HTTP Basic w/ Secret Key
Error Handling	–	Consistent error model	• HTTP status codes (2xx/4xx/5xx) • error.code / message • Clear client vs server	Programmable retries Clean UX on failure	HTTP Basic w/ Secret Key
Expand	?expand[]=…	Inline embed linked objects	• Up to 4 levels deep • Multiple fields per request	Fewer round trips Simpler client logic	HTTP Basic w/ Secret Key
Idempotency	Idempotency-Key header	Safe retries, no duplicates	• 24h storage • Automatic dedupe • Retry strategies	Prevents double charges	HTTP Basic w/ Secret Key
Metadata	metadata[key]=value	Attach custom key/value	• Up to 50 pairs • Values up to 500 chars	Flexible tracking Audit trails	HTTP Basic w/ Secret Key
Pagination	limit, starting_after, ending_before	Cursor-based lists	• Cursor instead of page# • Auto-pagination in SDKs	Efficient data handling	HTTP Basic w/ Secret Key
Search	/v1/.../search + query, page, limit	Full-text & filter queries	• SQL-like syntax • next_page cursor	Complex queries natively	HTTP Basic w/ Secret Key
Versioning / Req-ID	Stripe-Version header, Request-Id	Lock API version & debug	• Monthly backward-compatible releases • Unique request IDs	Stable upgrades Faster support	HTTP Basic w/ Secret Key

Core Payments APIs

PaymentIntents

- Manage full payment flows
- PSD2 compliant, 3DS flows built-in, auto status transitions
- Unified API for all methods

Charges

- Legacy direct charges
- Immediate capture, multiple captures
- Simple & direct integration

Checkout Sessions

- Hosted checkout UI
- Dynamic payment methods, A/B testing, CSS theming
- High conversions, no UI code needed

Payment Links

- No-code payment URLs
- Reusable links, price/product config
- Quick start, no dev

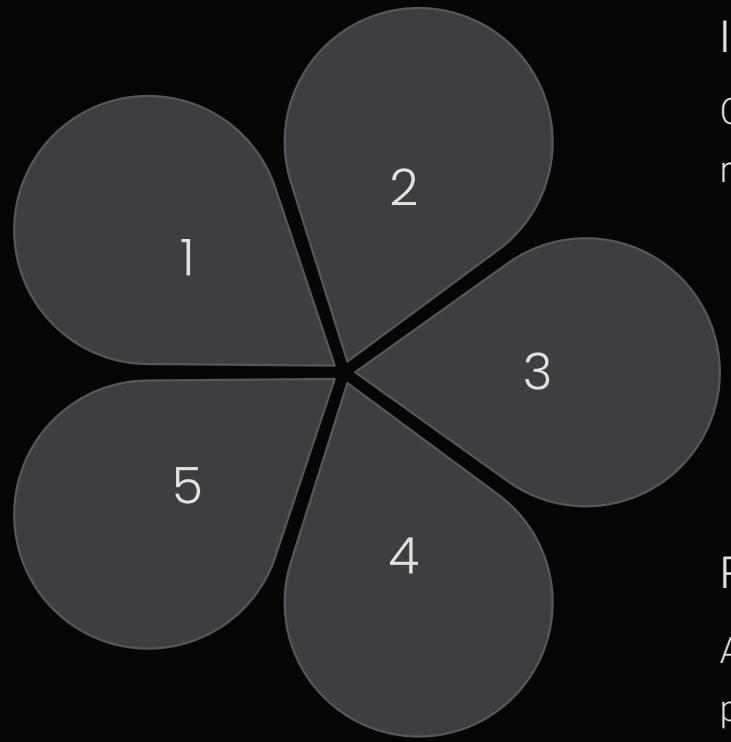

Billing & Subscriptions

Subscriptions

Manage recurring billing, usage & quantity based, trials, prorations

Payout Reconciliation

Match payouts to bank, detailed payout line-items, status flags

Invoices

Create & send invoices, email delivery, PDF rendering, reminder workflows

Tax

Automated tax calculation, country rules, threshold monitoring, reporting

Revenue Recognition

ASC 606 automation, real-time status, product/date categories

Connect & Marketplaces

1 **Auth & Scope**

Access & account scoping, Stripe-Account header, context switching

2 **Hosted Onboarding**

Prebuilt onboarding flow, standard UI, auto verification

3 **Embedded Onboarding**

Custom UI widgets, branding, unified UX, flexible config

4 **API Onboarding**

Full custom flow, fine-grained data, own UX

5 **Direct Charges**

Charge directly on connect, immediate funds, full fee control

6 **Destination Charges**

Platform charges then payout, platform fee, split remainder

7 **Separate Charges & Transfers**

Two-step payment flow, timing flexibility, partial splits

8 **Subscriptions (Connected)**

Recurring for sellers, usage & flat plans, trials & prorations

9 **Payouts**

Payout funds to accounts, schedule options, reversals/cancels

10 **Tax & Reporting**

Tax & 1099 reporting, threshold monitoring, form generation

11 **Radar**

Fraud prevention & scoring, platform-wide rules, real-time scoring

12 **Dashboard Components**

Seller UI widgets, balances, transactions, reports, full UI kit

13 **Global Currencies**

Worldwide payments & payouts, 135+ currencies, local methods, cross-border

14 **Platform Tools**

Central platform mgmt, multi-user roles, event logging, webhook config

Issuing, Treasury & Capital

1

Issuing

- Create & manage cards
- Physical & virtual, auth & capture controls, PIN/magstripe, dispute handling
- Real-time expense control

2

Treasury

- Banking-as-a-Service
- Multi-currency accounts, ACH/Wire flows, real-time balances
- Seamless cash mgmt

3

Capital

- Revenue-based financing
- % revenue repayment, offer lifecycle, status dashboard
- Fast capital access, no interest loans

4

Connect Capital

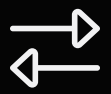

- Platform financing offers
- Platform-driven offers, API onboarding & monitoring
- Unified mgmt for platform & sellers

Treasury API Endpoints

Financial Accounts

/v1/treasury/financial_accounts

Transactions

/v1/treasury/transactions

Transaction Entries

/v1/treasury/transaction_entries

Inbound Transfers

/v1/treasury/inbound_transfers

Outbound Transfers

/v1/treasury/outbound_transfers

Capital & Connect Capital

Capital

- /v1/capital/financing_offers
- /:id/mark_delivered
- /v1/capital/financing_summary

Revenue-based financing, % revenue repayment, offer lifecycle, status dashboard, fast capital access, no interest loans

Connect Capital

- Same endpoints + Account Header

Platform financing offers, platform-driven offers, API onboarding & monitoring, unified mgmt for platform & sellers

Developer Tools & Infrastructure

Versioning & Changelog • SDKs & UI Components • Error Management • Testing & Sandbox • Event Destinations • Stripe CLI • Workbench • Stripe Shell • Developer Dashboard • LLM Integration • Security Best Practices • Apps & Connectors • Partner Ecosystem
