

Stripe.com - API Doc - by Chat GPT

Stripe API Quickstart

Base URL: **https://api.stripe.com/v1/** (HTTPS required)

Auth: HTTP Basic Auth – Username: your sk_…, leave password blank

Connect: Add header: Stripe-Account: acct_…

RAK/OAuth: Restricted API Keys or OAuth tokens for marketplaces

Billing & Subscriptions

1 Subscriptions

/v1/subscriptions, :id, :id/cancel, :id/resume, /search

- Manage recurring billing
- Usage & quantity based
- Trials, Prorations
- Predictable revenue, Flexible pricing

2 Invoices

/v1/invoices, :id, /create_preview, :id/finalize, :id/send, /search

- Create & send invoices
- Email delivery, PDF rendering
- Reminder workflows
- Automated dunning, Professional branding

3 Billing Payment Links

/v1/payment_links, :id/line_items

- No-code billing links
- Reusable, A/B testing
- Fastest go live

4 Tax

/v1/tax/rates, /v1/tax/calculations, /v1/tax/registrations

- Automated tax calculation
- Country rules, Threshold monitoring
- Reporting, Reduced error risk

Revenue Recognition & Reporting

Revenue Recognition

/v1/reporting/report_runs (recognized_revenue_summary_by_product)

- ASC 606 automation
- Real-time status
- Product/date categories
- Compliance assurance, Less bookkeeping

Payout Reconciliation

/v1/reporting/report_runs (itemized_payouts)

- Match payouts to bank
- Detailed payout line items
- Status flags
- Automated control, Faster close

Sigma (Custom Reports)

/v1/sigma/scheduled_query_runs/:id

- SQL-based reporting
- Scheduled runs, Output files
- Webhook notifications
- Deep real time insights

Data Pipeline

Dashboard export

- Warehouse export
- Full history, Auto updates
- BI integration, Central warehouse

External Data Import

No-code connector

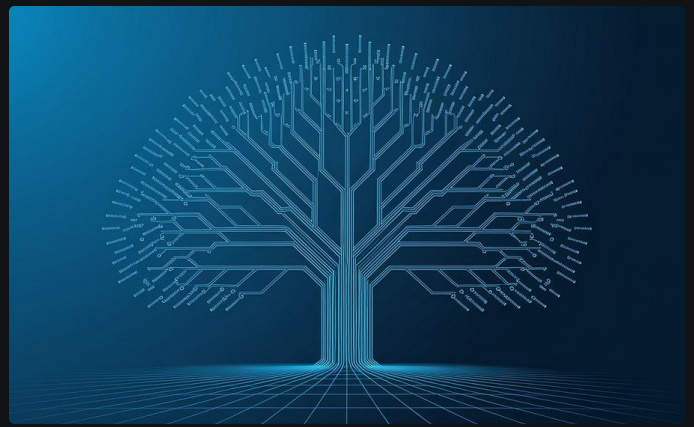

- Auto data import
- CSV, SFTP, API
- Mapping UI
- Unified dataset, Less ETL work

Atlas (Incorporation)

Atlas dashboard

- Company formation & EIN
- LLC/C-Corp options,
- Founders bundle
- Complete incorporation,

Expand, Idempotency & Metadata

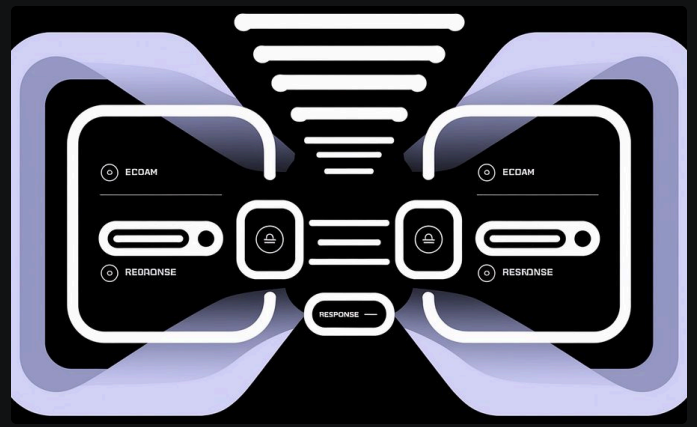

Expand

Inline embed linked objects

- Up to 4 levels deep
- Multiple fields per request
- Fewer round trips
- Simpler client logic

Auth: HTTP Basic with Secret Key

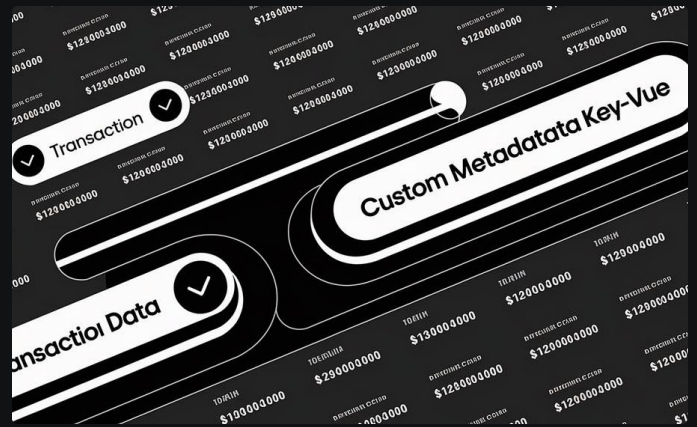

Idempotency

Safe retries, no duplicates

- 24h storage
- Automatic dedupe
- Retry strategies
- Prevents double charges

Auth: HTTP Basic with Secret Key

Metadata

Attach custom key/value

- Up to 50 pairs
- Values up to 500 chars
- Flexible tracking
- Audit trails

Auth: HTTP Basic with Secret Key

Pagination, Search & Versioning

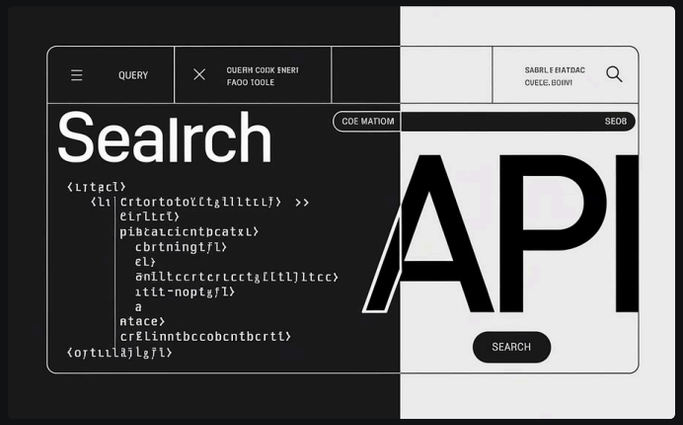

Pagination

Navigate large datasets efficiently with cursor-based lists using limit, starting_after, and ending_before parameters.

- Auto-pagination in SDKs
- Efficient data handling

Auth: HTTP Basic with Secret Key

Search

Powerful search capabilities via /v1//search endpoint with query, page, and limit parameters.

- Full-text & filter queries
- SQL-like syntax
- next_page cursor
- Complex queries natively

Auth: HTTP Basic with Secret Key

Versioning / Req-ID

Control API versions with Stripe-Version header and track requests with Request-Id.

- Lock API version & debug
- Monthly backward compatible releases
- Unique request IDs
- Stable upgrades, Faster support

Auth: HTTP Basic with Secret Key

Core Payments APIs

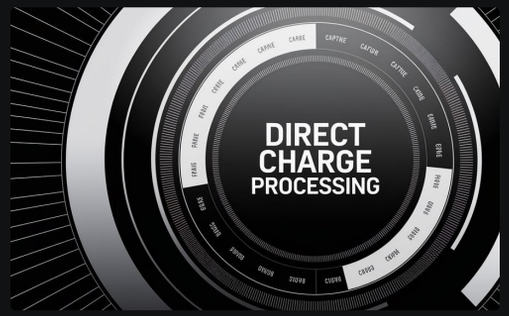

PaymentIntents

/v1/payment_intents, :id/confirm, :id/capture, :id/cancel

- Manage full payment flows
- PSD2 compliant, 3DS flows built-in
- Auto status transitions
- Unified API for all methods

Auth: API Key

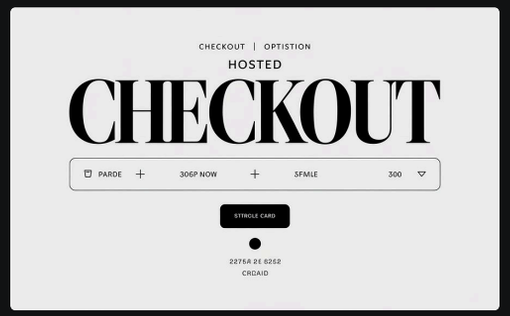

Charges

/v1/charges, :id, :id/capture

- Legacy direct charges
- Immediate capture, Multiple captures
- Simple & direct integration

Auth: API Key

Checkout Sessions

/v1/checkout/sessions, :id/line_items

- Hosted checkout UI
- Dynamic payment methods
- A/B testing, CSS theming
- High conversions, No UI code needed

Auth: API Key

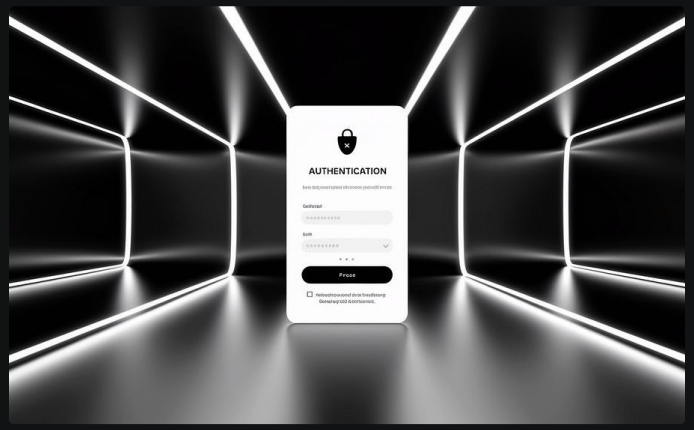

Payment Links

/v1/payment_links, :id/line_items

- No-code payment URLs
- Reusable links, Price/product config
- Quick start, no dev

Auth: API Key

SetupIntents, PaymentMethods & Webhooks

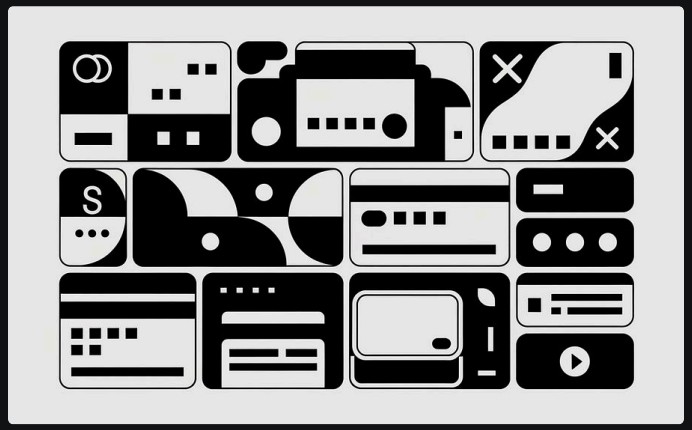

SetupIntents

/v1/setup_intents, :id/confirm, :id/cancel

- Save payment methods
- Auto-attach to customer
- Micro-deposit support
- Smooth future payments

Auth: API Key

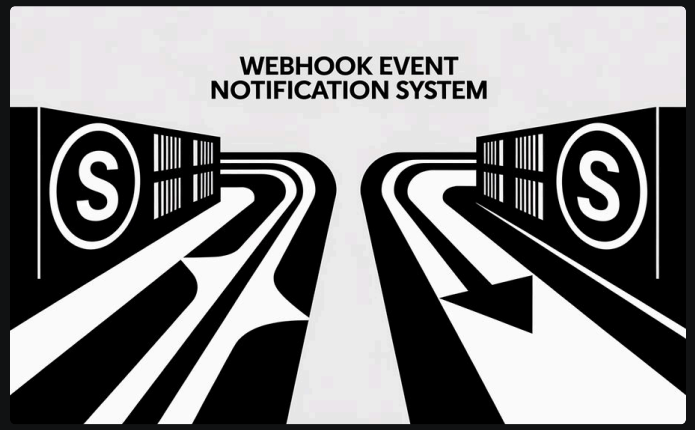

PaymentMethods

/v1/payment_methods, :id, :id/attach, :id/detach

- Manage payment instruments
- Cards, SEPA, wallets…
- Customer scoped
- Improved UX

Auth: API Key

Webhooks & Events

/v1/webhook_endpoints, /v1/events

- Async event handling
- Signature verification
- Retries & replay
- Real-time triggers
- Reliable automation

Auth: API Key + Webhook Secret

Connect & Marketplaces: Auth & Onboarding

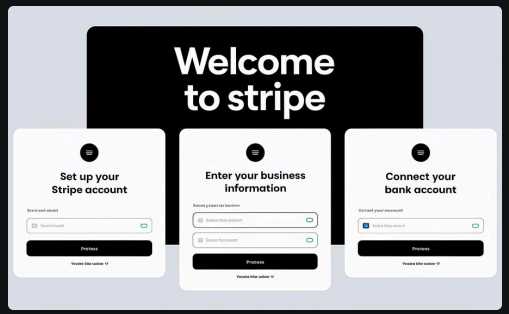

Choose the right onboarding approach for your platform needs

Auth & Scope

Access & account scoping with Stripe-Account header

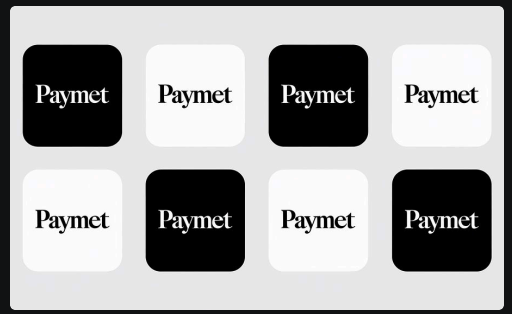

- Context switching between accounts
- Single key management
- Auth: HTTP Basic + Account Header

Hosted Onboarding

/v1/account_links

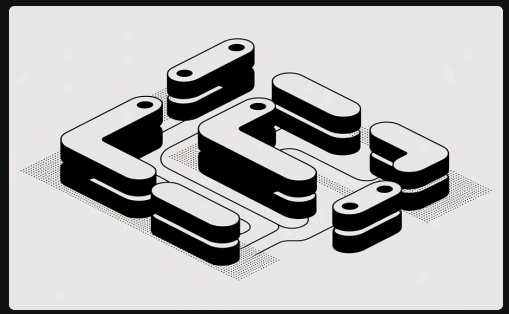

- Prebuilt onboarding flow
- Standard UI, Auto verification
- Fastest integration
- Auth: API Key + Account Header

Embedded Onboarding

Connect Components (JS/React)

- Custom UI widgets
- Custom branding, Unified UX
- Flexible configuration
- Auth: API Key + Account Header

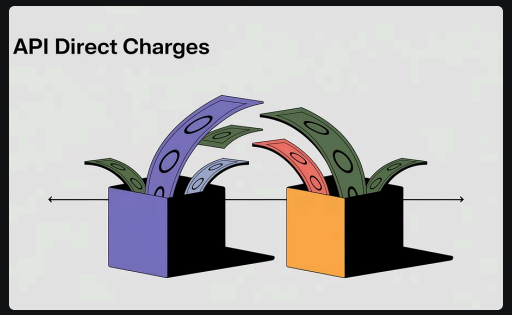

API Onboarding

/v1/accounts/:id/persons

- Full custom flow
- Fine-grained data
- Maximum flexibility
- Auth: API Key + Account Header

Connect: Charges, Transfers & Subscriptions

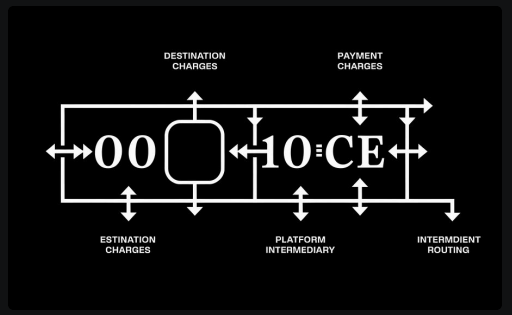

Direct Charges

POST /v1/charges + Account Header

- Charge directly on connect
- Immediate funds, Full fee control
- Clear revenue split

Auth: API Key + Account Header

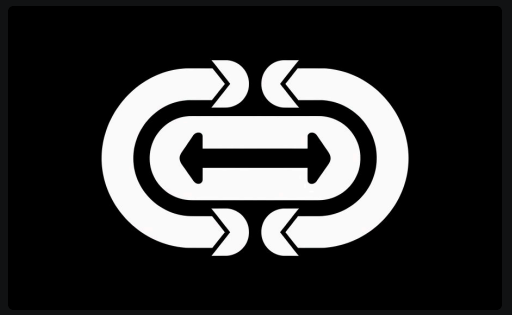

Destination Charges

POST /v1/charges + destination={acct_…}

- Platform charges then payout
- Platform fee, Split remainder
- Fee monetization, Transparency

Auth: API Key + Account Header

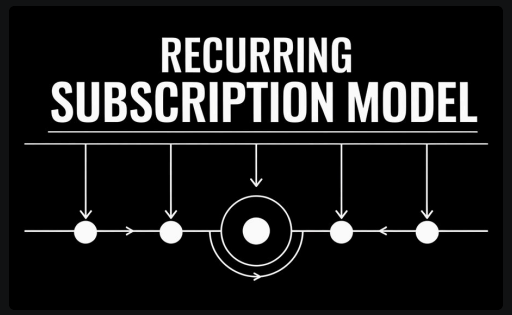

Separate Charges & Transfers

POST /v1/charges, POST /v1/transfers

- Two-step payment flow
- Timing flexibility, Partial splits
- Delayed/batched payouts

Auth: API Key + Account Header

Subscriptions (Connected)

POST /v1/subscriptions + Account Header

- Recurring for sellers
- Usage & flat plans
- Trials & prorations
- Automated seller billing

Auth: API Key + Account Header

Connect: Payouts, Tax, Reporting & Radar

Payouts

GET/POST /v1/payouts + Account Header

- Payout funds to accounts
- Schedule options, Reversals/cancels
- Automated payouts

Auth: API Key + Account Header

Tax & Reporting

/v1/tax/calculations + Account Header, /v1/reporting/report_runs

- Tax & 1099 reporting
- Threshold monitoring, Form generation
- Compliance automation

Auth: API Key + Account Header

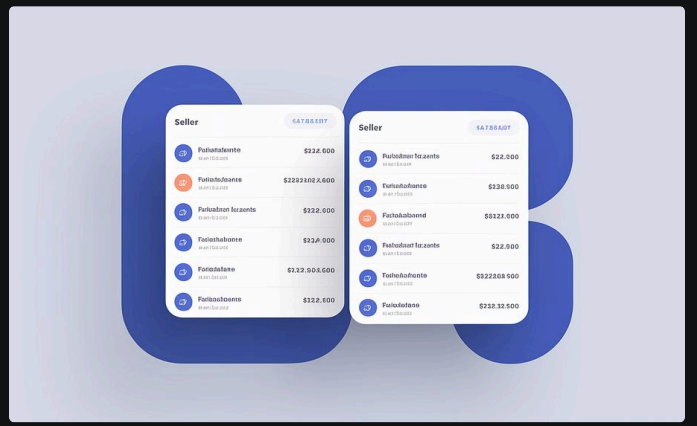

Radar

Dashboard rules

- Fraud prevention & scoring
- Platform-wide rules, Real-time scoring
- Fewer frauds, Unified policy

Auth: Dashboard Login + API Key

Connect: Seller Tools & Platform Management

Dashboard Components

Embedded Components

- Seller UI widgets
- Balances, Transactions, Reports
- Full UI kit, Seller self-service

Auth: API Key + Account Header

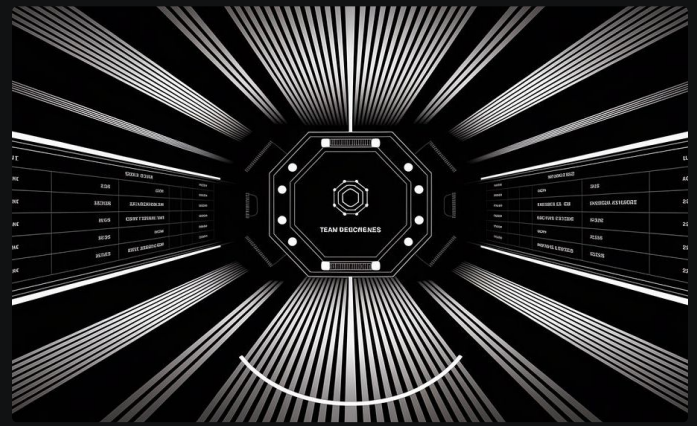

Global Currencies

Worldwide payments & payouts

- 135+ currencies
- Local methods, Cross-border
- Higher conversions

Auth: API Key + Account Header

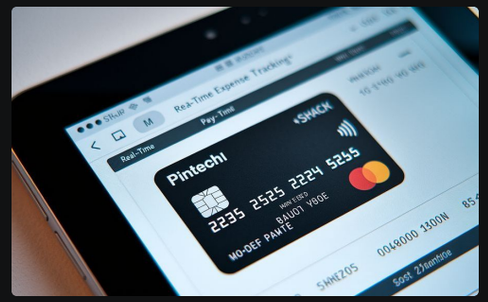

Platform Tools

Central platform management

- Multi-user roles
- Event logging, Webhook config
- Scalable permissions

Auth: Dashboard Login + API Key

Issuing, Treasury & Capital

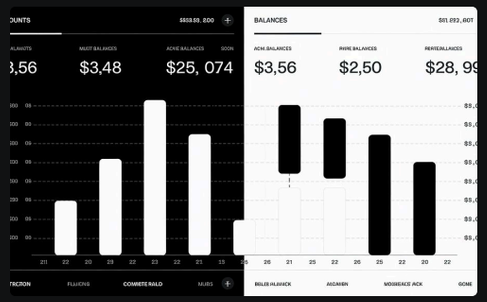

Issuing

/v1/issuing/cardholders, /v1/issuing/cards, /v1/issuing/authorizations/:id, /v1/issuing/disputes

Create & manage cards: Physical & virtual, Auth & capture controls, PIN/magstripe, Dispute handling. Real-time expense control.

Auth: API Key.

Treasury

/v1/treasury/financial_accounts, /v1/treasury/transactions, /v1/treasury/transaction_entries, /v1/treasury/inbound_transfers, /v1/treasury/outbound_transfers

Banking-as-a-Service: Multi-currency accounts, ACH/Wire flows, Real-time balances. Seamless cash management.

Auth: API Key.

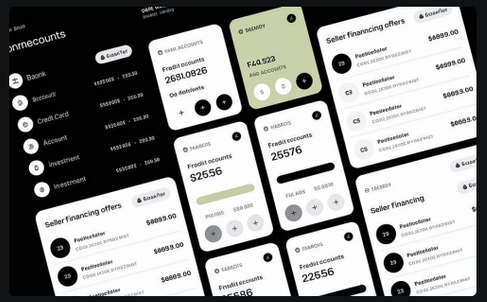

Capital

/v1/capital/financing_offers, :id/mark_delivered, /v1/capital/financing_summary

Revenue based financing: % revenue repayment, Offer lifecycle, Status dashboard. Fast capital access, No interest loans.

Auth: API Key.

Connect Capital

Same endpoints + Account Header

Platform financing offers: Platform-driven offers, API onboarding & monitoring. Unified management for platform & sellers.

Auth: API Key + Account Header.

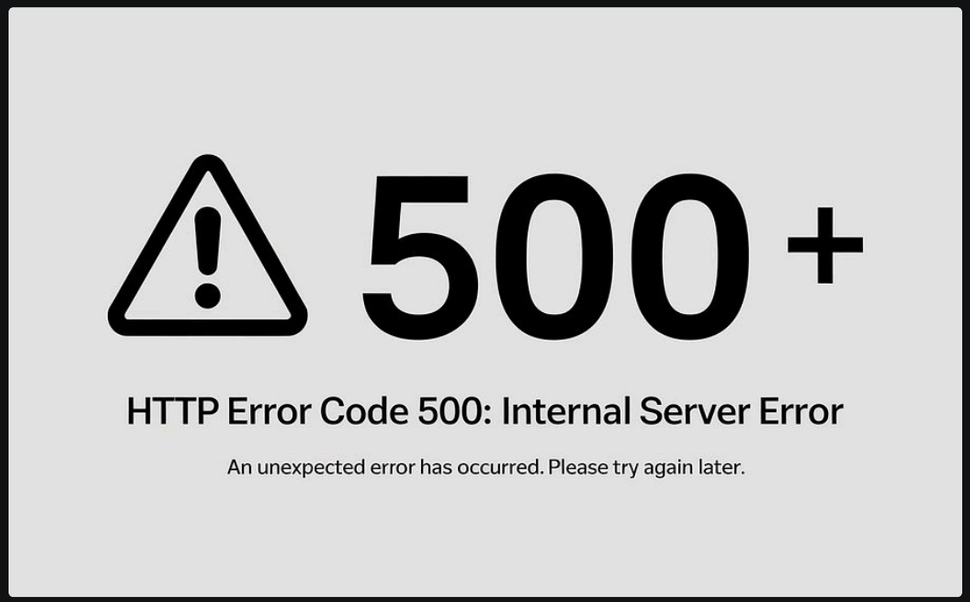

Developer Tools & Infrastructure

Versioning & Changelog	Track API changes	Monthly releases, Breaking-change notes, Dashboard changelog	Early break alerts	Stripe Version header
SDKs & UI Components	Official client libraries	Auto-pagination, Typed interfaces, UI elements	Less boilerplate	API Key
Error Management	Auth & robust errors	HTTP Basic auth, Standard error objects, Idempotency tools	Safe retries	HTTP Basic w/ Secret Key
Testing & Sandbox	Test clocks, helpers, simulators	Time travel, Webhook forwarding, Test fixtures	Complex flows safely	Test-Mode API Key
Event Destinations	/v2/core/event_destinations	Route events externally, Thin vs snapshot, Ping/enable/disable	Flexible routing	API Key
Stripe CLI	stripe commands	Fixture generation, Webhook forwarding, Live-mode simulate	Rapid prototyping	CLI login
Workbench	Dashboard UI	Query explorer, Event log, API version tests	Central troubleshooting	Dashboard login
Stripe Shell	In-browser CLI	Autocomplete, In-context samples	No local setup	Dashboard login
Developer Dashboard	Dashboard UI	Monitor calls & webhooks, Live logs, Request details, Quota watch	Real-time insight	Dashboard login

Authentication & Error Handling

Secure your API calls with Stripe's robust security system and handle errors effectively

Authentication

- Secures all API calls
- sk_test…/sk_live… keys
- Restricted keys
- Instant Test↔️Live switch
- Granular permissions

Uniform security, Flexible key rotation

Auth: HTTP Basic with Secret Key

Error Handling

- Consistent error model
- HTTP status codes (2xx/4xx/5xx)
- error.code / message
- Clear client vs server

Programmable retries, Clean UX on failure

LLM Integration, Security, Apps & Partner Ecosystem

LLM Integration

- LLMS.txt, API playground
- AI-assisted workflows
- Prompt templates, Auto docs fetch
- Faster prototyping
- Auth: API Key

Security Best Practices

- Key & infra protection
- Webhook signature, Key rotation, RBAC
- Minimized risk
- Auth: API Key + Webhook Secret

Apps & Connectors

- /v1/apps, Connectors UI
- Dashboard extensions
- UI extensions, OAuth flows, Templates
- Custom workflows
- Auth: API Key + OAuth

Partner Ecosystem

- Training & community
- Partner directory, Certification, Tutorials/Discord
- Expert network
- Auth: Partner portal
